

Sprint 2 Report

Trades

Group 22

Time length:

5-17-2017

Actions to stop doing:

- Coming to meetings unprepared.
 - Much of our time has been spent waiting for Android Studio to set up rather than actually implementing the application.
 - Two of our systems have been rendered unable to run Android Studio, so rather than spending time attempting to fix them, we should start pair programming.
 - Making sure our environments are working will enable us to work more efficiently with the limited time we can meet up.

Actions to start doing:

- Start committing to our Github repository frequently
 - This can cut out many potential merging errors and also can be used to go back if a later version turns out to break and no solution can be found for it.

Actions to keep doing:

- Having constant meetings and communication
 - Will keep everyone up to date for potential problems and solutions
- Coding while all of us are in the same room so that we can help each other out when we get stuck on parts
 - Gives everyone immediate access to help from peers as well as physical help for discussion and analysis

Work completed/not completed:

- Work Not Completed
 - Google login implementation
 - Ratings system
 - Allow user photo uploads
 - Implement Firebase Database
 - Implement special transitions for certain activities
- Work Completed
 - Create profile page
 - Create a "Make Listing" page
 - Create basic button functioning and transitioning
 - Create Buy/Sell Feed Pages
 - Text boxes for user description, email, phone number, name, and more

Work completion rate:

- **Total number of user stories completed: 3**
 - **User stories completed:**
 - As a designer, I want templates of all pages to be complete, so there is a basis for implementing the next buttons and functions.
 - As a programmer, I want a basic set of buttons and functions to be implemented, so that there is an outline for additional features and functions to be added onto.
 - As a busy worker, I want the transition from one activity to the next to be smooth, so that the app feels streamlined.
- **Total number of hours/days of the sprint:**
 - Days met within sprint: 7
 - Hours: 1-3 hours/per meeting
