Installation Guide/User Manual

Trades
Group 22
Time length:
6-5-2017

Installation Guide
- In order to install the app into your phone, you must download the Android file (Trades) from Github. After downloading the folder, open the file on Android Studio.
- To run it on Android Studio's emulator, download the (Trades) folder from Github, open the folder, and click on emulator.

User Manual

Our application is a Craiglist for students. When they open the application, they will receive instructions on how to work the application. Once they have finished the mini tutorial, they will be prompted to a Google sign in, in which their names and emails are populated into a profile page. Users are free to change their names and make their names. Once they make the account, they are prompt to a Buy and Sell page where they are able to make the transactions.
