Sprint 1 Report
Trades
Group 22
Time length:
4-28-2017

Actions to stop doing:
- Coming to meetings unprepared.
  - Much of our time has been spent waiting for Android Studio to set up rather than actually implementing the application. Making sure our environments are working will enable us to work more efficiently with the limited time we can meet up.

Actions to start doing:
- Start committing to our Github repository frequently
  - This can cut out many potential merging errors and also can be used to go back if a later version turns out to break and no solution can be found for it.

Actions to keep doing:
- Having constant meetings and communication
  - Will keep everyone up to date for potential problems and solutions
- Coding while all of us are in the same room so that we can help each other out when we get stuck on parts
  - Gives everyone immediate access to help from peers as well as physical help for discussion and analysis

Work completed/not completed:
- Work Not Completed
  - Creating the Buying List Page
  - Creating the "Make Listing" Page
  - Implementing functional buttons for page transitions
- Work Completed
  - We each have given each other assigned tasks
  - Some of each activity necessary has been completed
  - Android Studio has been set up for every member

Work completion rate:
- **Total number of user stories completed:** 1
  - **User stories completed:**
    - As a consumer, I want to see clear instructions on how to use the app, so that I will not be confused when using it.
- **Total number of hours/days of the sprint:**
